

# DAS|DAGA 2025 – 51st Annual Meeting on Acoustics

March 17-20, 2025, Copenhagen

## TABLE OF CONTENTS (Overview)

<b>Plenary Lectures</b> .....	1	Building Acoustics 1 .....	303
<b>Precolloquium</b> .....	15	Building Acoustics 2 .....	305
Hearing Acoustics:		Building Acoustics 3 .....	332
Models, algorithms and applications .....		Building Acoustics 4 .....	348
<b>Lectures and Posters</b> .....	22	Building Acoustics 5 .....	364
Acoular Workshop .....	22	Cavitation and Marine Noise: Advances in Experiments and Simulations .....	384
Acoustic Measurements and Sensor Technology (Poster) .....	45	Education in Acoustics .....	395
Acoustic Measurements and Sensor Technology 1 .....	61	Education in Acoustics (Poster) .....	400
Acoustic Measurements and Sensor Technology 2 .....	77	Effects of Noise & Noise Policy .....	420
Acoustic Scene Analysis using Artificial Intelligence .....	101	Effects of Noise & Noise Policy (Poster) .....	436
Acoustic Scene Analysis using Artificial Intelligence (Poster) .....	112	Efficient Technologies and Perceptual Optimization Of Dynamic Binaural Rendering 1 .....	439
Advanced Signal Processing for Ultrasound .....	124	Efficient Technologies and Perceptual Optimization Of Dynamic Binaural Rendering 2 .....	443
Aircraft Acoustics .....	132	Electroacoustics and Audio Signal Processing (Poster) .....	447
AUDICTIVE - Auditory Cognition in Interactive Virtual Environments (Poster) .....	144	Electroacoustics and Audio Signal Processing 1 .....	480
AUDICTIVE 1 - Auditory Cognition in Interactive Virtual Environments .....	152	Electroacoustics and Audio Signal Processing 2 .....	487
AUDICTIVE 2 - Auditory Cognition in Interactive Virtual Environments .....	159	Electroacoustics and Audio Signal Processing 3 .....	506
Audio Signal Analysis, AI and other Tools in Musical Acoustics (Poster) .....	168	Flow Acoustics (Poster) .....	513
Audio Signal Analysis, AI and other Tools in Musical Acoustics 1 .....	175	Flow Acoustics 1 .....	521
Audio Signal Analysis, AI and other Tools in Musical Acoustics 2 .....	183	Flow Acoustics 2 .....	533
Audiological Acoustics (Poster) .....	198	Flow Acoustics 3 .....	553
Audiological and Medical Acoustics .....	202	Generative Acoustic Design .....	576
Augmented Acoustic Reality 1 .....	209	Innovations in Urban Development to Reduce Traffic Noise .....	592
Augmented Acoustic Reality 2 .....	217	Methods for Technical and Perceptual Evaluations of Hearing Devices 1 .....	610
Binaural Technologies .....	229	Modeling of Flow-Induced Sound 1 .....	613
Bioacoustics .....	241	Modeling of Flow-Induced Sound 2 .....	617
Bioacoustics (Poster) .....	248	Musical Acoustics .....	637
Building Acoustic Regulations and Classification for Housing 1 .....	259	Musical Acoustics (Poster) .....	661
Building Acoustic Regulations and Classification for Housing 2 .....	268	Noise Assessment 1 .....	672
Building Acoustic Requirements in the Area of Conflict .....	280	Noise Assessment 2 .....	680
Building Acoustics (Poster) .....	299	Noise Assessment 3 .....	694
		Noise at the Work Place (Poster) .....	708
		Noise at the Work Place 1 .....	721
		Noise at the Work Place 2 .....	740
		Noise Control (Poster) .....	744
		Noise Control 1 .....	752
		Noise Control 2 .....	760
		Noise Control 3 .....	771
		Noise Effects in Children .....	786
		Noise Generation and Propagation .....	794
		Numerical Acoustics (Poster) .....	809

Numerical Acoustics 1.....	820	UAM/UAS Noise Emission and Perception 2.....	1408
Numerical Acoustics 2.....	828	Ultrasound.....	1416
Numerical Acoustics 3.....	847	Ultrasound (Poster).....	1420
Ocean Acoustics (Poster).....	874	Vehicle Acoustics (Poster).....	1431
Ocean Acoustics 1:		Vehicle Acoustics 1.....	1438
Ships, Noise and Propagation.....	889	Vehicle Acoustics 2.....	1466
Ocean Acoustics 2:		Vehicle Acoustics 3.....	1483
Ships, Noise and Propagation.....	896	Vehicle Acoustics 4.....	1495
Ocean Acoustics 3:		Virtual Acoustics & Binaural Technologies	
Ships, Noise and Propagation.....	912	(Poster).....	1506
Ocean Acoustics 4:		Virtual Acoustics 1.....	1525
Sonar & Underwater Communication.....	927	Virtual Acoustics 2.....	1545
Ocean Acoustics 5:		Virtual Acoustics 3.....	1568
Sonar & Underwater Communication.....	947	Waves in Solids.....	1584
Outdoor Sound propagation (Poster).....	959		
Outdoor Sound Propagation 1.....	967		
Outdoor Sound Propagation 2.....	975		
Physical Acoustics (Poster).....	990		
Physical Acoustics 1.....	1005		
Physical Acoustics 2.....	1017		
Physiological Acoustics (Poster).....	1029		
Physiological Acoustics 1.....	1045		
Physiological Acoustics 2.....	1049		
Psychoacoustics (Poster).....	1055		
Psychoacoustics 1.....	1073		
Psychoacoustics 2.....	1091		
Psychoacoustics 3.....	1099		
Psychoacoustics 4.....	1120		
Psychoacoustics 5.....	1122		
Room Acoustics (Poster 1).....	1142		
Room Acoustics (Poster 2).....	1161		
Room Acoustics 1.....	1169		
Room Acoustics 2.....	1181		
Room Acoustics 3.....	1185		
Room Acoustics 4.....	1199		
Room Acoustics 5.....	1218		
Soundscape.....	1236		
Soundscape (Poster).....	1252		
Speech Processing (Poster).....	1263		
Speech Processing 1.....	1279		
Speech Processing 2.....	1298		
Structure-Borne Sound and			
Vibration Technology 1.....	1314		
Structure-Borne Sound and			
Vibration Technology 2.....	1332		
Structure-Borne Sound and			
Vibration Technology 3.....	1351		
Structure-borne Sound and			
Vibrations (Poster).....	1359		
Sustainability in Acoustics.....	1370		
UAM/UAS Noise Emission and Perception			
(Poster).....	1385		
UAM/UAS Noise Emission and Perception 1.....	1389		

# TABLE OF CONTENTS

## Plenary Lectures

Binaural Measurement Technology and Psychoacoustics - Revolution or Evolution of Acoustic Measurement Technology? <i>Klaus Genuit</i>	1
Rethinking the Measurement of Sound Absorption: Challenges, Advances and Emerging Methods <i>Mélanie Nolan</i>	8
Lost in Transmission? Understanding and minimizing undesired side effects of hearing devices <i>Florian Denk</i>	12

## Precolloquium

### Hearing Acoustics: Models, algorithms and applications

*Organisation: Torsten Dau and Volker Hohmann*

Physical Mechanisms Underlying the Occlusion Effect <i>Simon Kersten and Michael Vorländer</i>	15
Real-time assessment of listening effort using non-intrusive binaural prediction models <i>Jan Rannies-Hochmuth, Martin Berdau, Rainer Huber, Hannah Baumgartner, Simon Weihe and Thomas Brand</i>	18

# Lectures and Posters

## Acoular Workshop: Accessible and Reproducible Microphone Array Signal Processing with Python

*Structured Session, Organisation: Ennes Sarradj, Oliver Ackermann Lyloff and Gert Herold*

Acoular Workshop: Accessible and Reproducible Microphone Array Signal Processing with Python <i>Ennes Sarradj, Mikolaj Czuchaj, Gert Herold, Adam Kujawski, Oliver Lyloff and Art Pelling</i>	22
Acoular Workshop: Generating Synthetic Sound Pressure Time Datasets of Multicopter Drone Fly-bys <i>Gert Herold, Mikolaj Czuchaj, Adam Kujawski, Oliver Lyloff, Art Pelling and Ennes Sarradj</i>	26
Acoular Workshop: Beamforming in the time domain with moving sources <i>Mikolaj Czuchaj, Gert Herold, Adam Kujawski, Oliver Lyloff, Art Pelling and Ennes Sarradj</i>	29
Acoular Workshop: An Interactive Tutorial on Advanced Microphone Array Methods for Acoustic Source Mapping <i>Adam Kujawski, Mikolaj Czuchaj, Gert Herold, Oliver Lyloff, Art Pelling and Ennes Sarradj</i>	33
Acoular Workshop: Acoustic Data Acquisition and Processing in Python using a MEMS Microphone Array <i>Rabea Eschenhagen, Mikolaj Czuchaj, Gert Herold, Adam Kujawski, Oliver Lyloff, Art Pelling and Ennes Sarradj</i>	37
Comparison of Embedded Hardware Platforms for Optimized Machine Learning-Based Acoustic Imaging <i>Jakob Tschavoll and Adam Kujawski</i>	41

## Acoustic Measurements and Sensor Technology (Poster)

MEMS-Microphone Arrays for the Measurement of Spatial Loudspeaker Characteristics in the Near-Field <i>Stephan Herzog and Manuel Schalk</i>	45
The Acoustic Calibration System for the IceCube Upgrade <i>Christoph Günther, Jan Audehm, Jürgen Borowka, Pierre Dierichs, Mia Giang Do, Dirk Heinen, Andreas Nöll, Christopher Wiebusch and Simon Zierke</i>	49
Status and Latest Results of the Ice Sonar in the Forefield Reconnaissance System for the TRIPLE Project <i>Jan Audehm, Mia Giang Do, Simon Goldmann, Christoph Günther, Dirk Heinen, Andreas Nöll, Christopher Wiebusch and Simon Zierke</i>	53
Use of substitute immission locations for the measurement of shooting noise <i>Mattias Trimpop</i>	57

## Acoustic Measurements and Sensor Technology 1

Using Burst Excitation to obtain Acoustic Material Properties in Impedance Tubes <i>Felix Huber, Semere Birhane Gebrekidan, Maximilian Lösch and Florian Toth</i>	61
High sound pressure calibration by standing wave resonance method <i>Lars Lindemose and Henrik Carlsen</i>	65
Torus-measurement - Opportunities for acoustic and structural monitoring of road surface quality <i>Nikolas Kirchhoff, Ronny Schreiter, Bert Peeters and Manuel Männel</i>	69
Correlation between road traffic, particulate matter and noise - initial analyses <i>Steffi Reinhold, Andreas Ruff, Cornelius Würfel and Berndt Zeitler</i>	73

## Acoustic Measurements and Sensor Technology 2

Validation of the DLR dual stream jet noise test rig at the Aeroacoustic Wind Tunnel Braunschweig <i>Christian Jente and Peer Böhning</i>	77
Use of a Model for Coherence Loss in the Context of Aircraft Fly-Over Measurements <i>Timo Schumacher and Henri Siller</i>	81
Sound Source Localization with Beamforming and Pitch Detection <i>Bence Csóka, Péter Fiala and Péter Rucz</i>	85
The application of deep learning in microphone array single-source tracking systems <i>Chao-Min Wu and Guan-Ming Peng</i>	89
MPEG Audio Coding for Machines <i>Thomas Sporer and Sang-Wook Kim</i>	93
Erkennung von Anomalien in Kugelgewindetrieben auf Basis von Beschleunigungsdaten <i>Rea Eleni Lenser, Oliver Ehni, Thomas Hediger, Matthias Klärner, Matthias Deckert and Lothar Kroll</i>	97

## Acoustic Scene Analysis using Artificial Intelligence

*Structured Session, Organisation: Jakob Abeßer and Toni Heittola*

Handling Domain Shifts for Anomalous Sound Detection: A Review <i>Kevin Wilkinghoff, Takuya Fujimura, Keisuke Imoto and Jonathan Le Roux</i>	101
Extension of the auditory information in time-frequency representations of audio signals for machine learning applications <i>Draško Mašović, Jakob Bergner, Kevin Hock, Christoph Sladeczek and Joachim Bös</i>	105
Semi-supervised Learning for Acoustic Scene Classification using FixMatch <i>Sascha Grollmisch, Ravi Kumar and Jakob Abeßer</i>	109

## Acoustic Scene Analysis using Artificial Intelligence (Poster)

*Structured Session, Organisation: Jakob Abeßer and Toni Heittola*

Bridging the Gap: GANs as a Solution for Data-Scarce Industrial Audio Classification <i>Pitchapa Ngamthipwatthana, Saichand Gourishetti, Andrew McLeod and Sascha Grollmisch</i>	112
Distilling Efficient Audio Models using Data Pruning with CLAP <i>Alexander Werning and Reinhold Haeb-Umbach</i>	116
Data-Driven Plane Wave Decomposition on Early Room Impulse Response Patterns <i>Frank Schultz, Carolin Uhlenbrock and Sascha Spors</i>	120

## Advanced Signal Processing for Ultrasound

*Structured Session, Organisation: Ute Rabe, Ulrike Steinmann and Frieder Lucklum*

A Simulation-Based Comparison of Beamforming Strategies for Local Speed of Sound Estimation using Annular Arrays <i>Christian Kupsch, Yahya Moshaei Nezhad, Mario Wolf and Elfgard Kühnicke</i>	124
Focusing Properties of Annular, Line and Matrix Arrays for Ultrasound Thermometry <i>Elfgard Kühnicke, Sebastian Stahl, Mario Wolf, Emanuel Leipner and Christian Kupsch</i>	128

## Aircraft Acoustics

- Optimal Acoustic Metamaterial Property Determination for the Reduction of Propeller Noise 132  
*Michael Schmähl and Mirko Hornung*
- About correctly comparing wind tunnel experiments with flyover measurements 136  
*Michael Mößner*
- An Overview of Low-noise Approach and Departure Procedures for an Electrified Aircraft 140  
*Paul Abromeit, Ralf Burgmayer, Lothar Bertsch, Joscha Kurz, Thomas Geyer and Lars Enghardt*

## AUDICTIVE - Auditory Cognition in Interactive Virtual Environments (Poster)

*Structured Session, Organisation: Janina Fels and Carolin Breuer*

- Evaluation of lip synchronization algorithms via SRT measurements in virtual environments 144  
*Juergen Otten, Gerard Llorach Tó, Giso Grimm and Volker Hohmann*
- Comparison of an image-based machine learning algorithm for real-time lip synchronization with a rule-based audio signal algorithm using cortical speech tracking 148  
*Juergen Otten, Mareike Daeglau, Bojana Mirkovic, Giso Grimm, Stefan Debener and Volker Hohmann*

## AUDICTIVE 1 - Auditory Cognition in Interactive Virtual Environments

*Structured Session, Organisation: Janina Fels and Carolin Breuer*

- Effects of Individualizing Binaural Auralizations on Presence, Realism, and Affective Reactions in Stressful Social Virtual Interactions 152  
*Sarah Roßkopf, Leon O. H. Kroczeck, Felix Stürz, Matthias Blau, Steven van de Par and Andreas Mühlberger*
- Exploring the Impact of Room Acoustics on Auditory Selective Attention 156  
*Carolin Breuer, Larissa Leist, Stephan Fremerey, Alexander Raake, Maria Klatt and Janina Fels*

## AUDICTIVE 2 - Auditory Cognition in Interactive Virtual Environments

*Structured Session, Organisation: Janina Fels and Carolin Breuer*

- Influence of (non-) intelligible background speech on memory and listening effort in conversational situations 159  
*Cosima A. Ermert, Jonathan Ehret, Chinthusa Mohanathanasan, Andrea Bönsch, Torsten W. Kuhlen, Sabine J. Schlittmeier and Janina Fels*
- Cue-related Evoked Potentials Capture Auditory Attention Switches 161  
*Lukas Vollmer, Leonie Schmitz, Karin Loh and Janina Fels*
- Investigation of binaural distance estimation with artificial neural networks trained on simulated data models 164  
*Daniel Neudek, Benjamin Stodt, Stephan Getzmann and Rainer Martin*

## Audio Signal Analysis, AI and other Tools in Musical Acoustics (Poster)

*Structured Session, Organisation: Christoph Reuter and Cumhur Erkut*

- I see something you can only hear - Visualising musical performance with SInES tools and sonic cam 168  
*Christoph Reuter, Carolin Schmid, Silas Yang and Jian Yang*
- Evaluating Timbre-Related Audio Descriptors Across Different Libraries and Multimodal Embeddings 171  
*Isabella Czedik-Eysenberg and Christoph Reuter*

## Audio Signal Analysis, AI and other Tools in Musical Acoustics 1

*Structured Session, Organisation: Christoph Reuter and Cumhur Erkut*

- Rehearsals, Risks and Resilience: Stress, Acoustics, and Youth Orchestra Performance 175  
*Matthias Bertsch, Christoph Reuter, Tristan Leitz and Marik Roos*
- Methoden der auditiven virtuellen Realität für die Virtualisierung der Klangbeurteilung im Musik-instrumentenbau 179  
*Tom Wühle, Sebastian Merchel and M. Ercan Altinsoy*

## Audio Signal Analysis, AI and other Tools in Musical Acoustics 2

*Structured Session, Organisation: Christoph Reuter and Cumhur Erkut*

- SciencE shines with SInES - SInES Tools for audio and video analysis - New updates and improvements 183  
*Christoph Reuter, Isabella Czedik-Eysenberg, Anja-Xiaoxing Cui, Marik Roos, Sarah Ambros, Matthias Eder, Jian Yang and Matthias Bertsch*
- On the Problem of the Bifurcation of Nature in Digital Musical Instrument Design and the Possibility of Minimising the Problem by Using Process-Ontology 187  
*Cornelius Pöpel*
- Physics- and Psychoacoustics-Based Analysis of Viscoelastically Damped Membranes 191  
*Cristhiam Fidel Martínez Orellanos and Rolf Bader*
- Sick Kick: A Foot Controller for Expressive Sound Manipulation 195  
*Sebastian Merchel and M. Ercan Altinsoy*

## Audiological Acoustics (Poster)

- Investigations of the Effect of 3D Bioacoustic Signals Reproduced in a VR Room on Patients in a Geriatric Ward of a Hospital 198  
*Cornelius Pöpel and Roland Schnurpfeil*

## Audiological and Medical Acoustics

- Assessing Hyperacusis via Questionnaire: Results from a Large (N > 200) German-Language Online Survey 202  
*Wolfgang Ellermeier, Karin Zimmer, Eunsung Song, Catherine Marquis-Favre and Sang Hee Park*
- Spatial release from masking with and without simulated hearing loss: Comparison of different spatial audio reproduction methods 206  
*Thomas Deutsch, Luigi Falanga, Iring Koch and Janina Fels*

## Augmented Acoustic Reality 1

*Structured Session, Organisation: Jürgen Peissig, Johannes Arend and Stefan Weinzierl*

- First experiments on how to blend playback and recording rooms in headphone based reproduction of multichannel sound 209  
*Karlheinz Brandenburg, Nils Merten, Renato Profeta, Christian Schneiderwind, Ulrike Sloma, Thomas Thron and Jeramey Tyler*
- Directional Alignment of Binaural and Loudspeaker Playback Systems Using a QR Code 213  
*Kyrill Klaus and Johann-Markus Batke*

## Augmented Acoustic Reality 2

*Structured Session, Organisation: Jürgen Peissig, Johannes Arend and Stefan Weinzierl*

- |   |     |
|---|-----|
| Investigating the Plausibility of Real Sound Sources Captured with Spherical Microphone Arrays<br><i>Hendrik Himmelein, Tim Lübeck and Christoph Pörschmann</i> | 217 |
| HRTF Measurement System with Rotating Loudspeakers<br><i>Payman Azaripasand and Bernhard U. Seeber</i>  | 221 |
| Symmetries in Complex-Valued Spherical Harmonic Processing of Real-Valued Signals<br><i>Thomas Deppisch and Jens Ahrens</i>                                     | 225 |

## Binaural Technologies

- |  |     |
|--|-----|
| Towards Models for Listener Envelopment based on Binaural Multi-source Localization<br><i>Stefan Riedel, Matthias Frank and Franz Zotter</i>               | 229 |
| Localizing Sources with an Artificial Head Using Head-Above-Torso Rotations<br><i>Magnus Schäfer, Maximilian Kentgens, Haiko Brücher and Mihaly Barany</i> | 233 |
| Restoring Spatial Hearing in Active Noise Control Headphones<br><i>Florian Ernst and Delf Sachau</i>   | 237 |

## Bioacoustics

- |  |     |
|--|-----|
| Analyzing Polyphonic Vocal Patterns of Ross Seals<br><i>Julian Härtel, Ilse van Opzeeland, Volker Hohmann, Mia Wege and Thomas Brand</i>   | 241 |
| Three-Dimensional Volume Estimation of Automated Ultrasonic Detectors for Acoustic Bat Monitoring<br><i>Daniel Harder, Steffi Reinhold, Berndt Zeitler and Veit Dominik Kunz</i> | 245 |

## Bioacoustics (Poster)

- |   |     |
|---|-----|
| Analysing Bowel Sound Signals: Insights from SonicGuard Data Collection<br><i>Zahra Mansour, Sina Grabowski, Verena Uslar, Dirk Weye, Danilo Hollosi and Nils Strodthoff</i>  | 248 |
| Detecting Bark Beetle Activity in a Timber Log via Airborne Sound<br><i>Jacopo Barzon, Florian Klein, Andreas Männchen, René Rodigast, Daniel Beer and Joachim Bös</i>        | 252 |
| Humming and Buzzing - Acoustical Features of Annoying Mosquito Noises<br><i>Sarah Ambros, Christoph Reuter, Isabella Czedik-Eysenberg, Julia Donnerer and Christian Adams</i> | 256 |

## Building Acoustic Regulations and Classification for Housing – Limits, Enforcement and Documentation 1

*Structured Session, Organisation: Birgit Rasmussen and Christian Nocke*

- |   |     |
|---|-----|
| Development of Sound Insulation Requirements in German DIN 4109<br><i>Martin Schneider, Heinz-Martin Fischer and Berndt Zeitler</i>                                     | 259 |
| Die neue DEGA-Richtlinie 103-2 - Schallschutzausweis<br><i>Christian Burkhart</i>   | 263 |
| Praxisvortrag gebäudetechnische Anlagen nach DEGA-Richtlinie 103-1: 2024-09 am Beispiel von Aufzuganlagen<br><i>Moritz Schach, Kim Marcus Weidlich and Dieter Gross</i> | 265 |

## Building Acoustic Regulations and Classification for Housing – Limits, Enforcement and Documentation 2

*Structured Session, Organisation: Birgit Rasmussen and Christian Nocke*

Evaluating Sound Insulation for Door Leaves: A Collaborative Study <i>Lars Sommer Søndergaard, Lovisa Ryman and Thais Bjerregaard</i>	268
Neighbour noise questions in national surveys <i>Ayca Sentop Dumen and Birgit Rasmussen</i>	272
Traffic noise propagation into buildings - physics, measurements, and legislation <i>Jan Krüger, Michaela Marxt and Berndt Zeitler</i>	276

## Building Acoustic Requirements in the Area of Conflict between Climate Protection, Building Costs, Health Protection and Comfort

*Structured Session, Organisation: Martin Schneider and Birgit Rasmussen*

Sound insulation requirements in multi-storey housing - A health issue or just comfort? <i>Birgit Rasmussen</i>	280
Towards an Introduction of Low Frequency Spectrum Adaption Terms in Norwegian Building Legislation <i>Gjermund V. Holøyen</i>	284
Cost-effective construction and acoustic requirements: Is there a need to adjust the standards? <i>Adrian Blödt and Andreas Rabold</i>	288
Considerations on building type E from a sound insulation perspective <i>Steffen Blessing and Martin Schneider</i>	292
Assessment of reduction of thickness of separating elements in massive clay brick buildings on the perspective of sound insulation, construction effort and sustainability <i>Kai Naumann</i>	295

## Building Acoustics (Poster)

Sound insulation measurements of newly built acoustic laboratory test rooms <i>Victor Gaubert, Monica Ballesteros Villareal, Jonas Brunskog and Mads Bolberg</i>	299
---	-----

## Building Acoustics 1

Calibration of building acoustics test benches <i>Bernd Saß</i>	303
--	-----

## Building Acoustics 2

The Attached Soundproof Window. The Building Physics All-Rounder. <i>Reinhard Neubauer and Alexander Estler</i>	305
Assessing Low-Frequency and Infrasonic Noise Transmission through German Building Façades <i>Lukas Roskosch and Benjamin Bernschütz</i>	308
The Sound Reduction Index of Homogeneous Building Elements according to Annex B of ISO 12354-1 - Discussion and Proposal for Changes <i>Christoph Höller, Michael Parzinger and Ulrich Schanda</i>	312
Resonance frequency measurement of floors in a test stand and in situ <i>Christian Lux, Maximilian Neusser, Moritz Simececk and Bernd Nusser</i>	316
Analysis of the sound transmission process through a balcony thermal insulation element <i>Lucas Heidemann, Jochen Scheck and Berndt Zeitler</i>	320

Statistical analysis of the Rw based on the parametrization of an optimized model according to ISO 12354-1 <i>Michael Parzinger and Ulrich Schanda</i>	324
Sustainability and building acoustics <i>Marco Kuster</i>	328

## Building Acoustics 3

BIM for Building Acoustics: Integration of building acoustics in an open BIM workflow <i>Camille Châteauvieux-Hellwig, Dieter Brockmeyer, Nico Brockmeyer, Ulrich Schanda and Matthias Mitterhofer</i>	332
Predicting the sound insulation of lightweight frame walls using an artificial neural networks approach <i>Erik Nilsson, Klas Hagberg and Delphine Bard Hagberg</i>	336
Improving Sound Insulation in Cross-Laminated Timber (CLT) Wall Assemblies: A Systematic Investigation <i>Peter Perivoitos, Lucas Heidemann, Johannes Weinhold and Berndt Zeitler</i>	340
Vibro-acoustic prediction model for impact sound insulation of cross-laminated timber <i>Melanie Førsterling Gotfredsen, Julie Bech Lienggaard, Christoffer Weitze and Jonas Brunskog</i>	344

## Building Acoustics 4

Development of laboratory sound insulation measurement methods of cross-laminated timber elements <i>Julie Bech Lienggaard, Melanie Førsterling Gotfredsen, Rasmus Stahlfest Holck Skov and Jonas Brunskog</i>	348
Influence of construction details on impact sound insulation of timber-concrete composite (TCC) floors <i>Alexander Stenitzer, Christian Lux and Bernd Nusser</i>	352
Acoustical characterization of fresh and waste water systems - Towards a unified approach <i>Lukas Däuble, Jochen Scheck and Berndt Zeitler</i>	356
Optimisation of the Usage noise of a Shower tray in Timber construction <i>Christoph Geyer, Ulrich Kauz and Joel Burkhalter</i>	360

## Building Acoustics 5

Building Services Equipment - From Source Characterization and Prediction to Validation in Buildings <i>Tobias Kruse, Fabian Schöpfer, Andreas Mayr, Thorsten Schmidt and Thomas Hanz</i>	364
Determination of the acoustic source data of air source heat pumps (ASHP) for calculating noise from building service equipment <i>Gina Boschatzke, Michael Krämer and Bernd Kaltbeitzel</i>	368
Experimental study on using transient excitation signals in the prediction of sound pressure levels from building services according to EN 12354-5 and EN 15657 <i>Anna Rieger, Lukas Däuble, Jochen Scheck, Berndt Zeitler and Christoph Höller</i>	372
Testing building acoustic test facilities by reference elements - current status <i>Sylvia Stange-Kölling and Volker Wittstock</i>	376
Learnings from round robin of Danish providers of building acoustical documentation <i>Mads Bolberg, Julie B. Lienggaard and Niels Peter Moos</i>	380

## Cavitation and Marine Noise: Advances in Experiments and Simulations

*Structured Session, Organisation: Robert Mettin and Per Trøggård Andersen*

- Acoustic Cavitation Effects at Reduced Static Pressure 384  
*Shigeto Nakamura, Max Koch, Matti Tervo, Atiyeh Aghelmaleki and Robert Mettin*
- Characterising a high-end ultrasonic toothbrush for its use as a low-cost well sonicator 388  
*Sofia Voimanen, Nicole Anderton and Michiel Postema*
- Experimental Validation of the Innovative Non-Intrusive Cavitation Detection System (Ni-CDS) 391  
*Publio Beltrán Palomo, Luis Antonio Piqueras González-Tejero, Richard García Méndez and Santiago Molins*

## Education in Acoustics

- wiki.audio: collaborative platform for interactive web-based education 395  
*Malte Kob, Jörg Bitzer, Christian Epe, Timo Grothe, Larissa Warkentin, Ralph Kessler, Dieter Leckschat and Ingo Weismantel*
- Bridging Tradition and Technology: How to Enhance Guqin Pedagogy based on Acoustic Analysis 398  
*Jiarui Tian, Manwa Ng and Yang Chen*

## Education in Acoustics (Poster)

- Interactively controlled real-time auralization of moving sound sources on a multi-loudspeaker setup for student experiments 400  
*André Jakob*
- Klangwelt-Entdecker - Ein interaktives Naturpädagogikprojekt zur Sensibilisierung für die Klangwelt am Altmühlsee A Web-based Interactive Soundscape Pedagogical Project to Strengthen Bioacoustic Awareness 404  
*Pascal Vogel and Cornelius Pöpel*
- Approaching an Unbiased Microphone Comparison in Tonmeister Training 408  
*Michel Miersch, Samuel Sebastian Huber, Malte Kob and Timo Grothe*
- Wavefront: A TLM-based Simulation Platform for Teaching Basic Wave Propagation Principles 412  
*Leo Kling, Jonathan David Kron, Hendrik Himmelein and Christoph Pörschmann*
- Detmold interactive Musical Instrument Timbre Explorer (DmITE) - a web application for experiential learning in musical acoustics 416  
*Timo Grothe, Hamit Batuhan Aydin, Davide Andrea Mauro, Luca Andrea Ludovico and Axel Berndt*
- wiki.audio Project: Enhancing Multilingual Access to Audio and Acoustics Knowledge 418  
*Hamit Batuhan Aydin, Carlos Mata, Ava Chisholm, Larissa Warkentin, Jörg Bitzer and Malte Kob*

## Effects of Noise & Noise Policy

- Requirements for Environmental Noise Measurements 420  
*Per Finne and Frank Pedersen*
- Development of a concept for quieter rail transport in Germany 422  
*Luca Thomma, Markus Hecht, Kay Mitusch and Eckhard Pache*
- Different Logging Rates for Measuring the Prominence of Impulsive Sounds for Adjusting LAeq in ISO PAS 1996-3 426  
*Douglas Manvell, Thom King and Michael Whiteman*
- Investigating the perception of a heat pump in different audio-visual settings 430  
*Lara Stürenburg, Lukas Aspöck and Janina Fels*

Evaluation of Stress in Response to Traffic Noise Using Virtual Reality <i>André Kruh-Elendt, Christian Laufs, Jonas Heck, Janina Fels, Moritz Lippold, Christoph Klanten and Andreas Herweg</i>	432
---	-----

## Effects of Noise & Noise Policy (Poster)

Acoustic simulation and auralizations to investigate the impact of textile building façades in urban environments <i>Lukas Aspöck, Chalotorn Möhlmann, Philipp Schäfer, Hanna Potulski, Vanessa Overhage, Thomas Gries, Christa Reicher and Janina Fels</i>	436
--	-----

## Efficient Technologies and Perceptual Optimization Of Dynamic Binaural Rendering 1

*Structured Session, Organisation: Annika Neidhardt, Nils Meyer-Kahlen and Jens Ahrens*

Exploring Dynamic Binaural Rendering Approaches in 6DoF Acoustic Augmented Reality <i>Vincent Martin, Julie Meyer and Lorenzo Picinali</i>	439
---	-----

## Efficient Technologies and Perceptual Optimization Of Dynamic Binaural Rendering 2

*Structured Session, Organisation: Annika Neidhardt, Nils Meyer-Kahlen and Jens Ahrens*

Challenges of conducting a large-scale online perceptual study in the field of spatial audio <i>Lukas Treybig, Florian Klein, Steve Göring and Stephan Werner</i>	443
--	-----

## Electroacoustics and Audio Signal Processing (Poster)

Sound of Sirens as Acoustic Landmarks within the European Union <i>Juan Manuel Rodriguez Mejia, Christian Kehling, Kashan Sardar and Stephan Werner</i>	447
Enhancing Programming Skills in Audio Signal Analysis and AI: A Problem-Based Learning Approach <i>Tessa Taefi</i>	450
Binaural room impulse responses interpolation using physics-informed neural networks in three dimensions <i>Yazhou Li, Lin Wang and Joshua Reiss</i>	454
Modeling of Microchannel Acoustics: Relevant Phenomena and Acoustic Impedance Models <i>Andreas Männchen, Albert Zhykhar, Jan Küller and Daniel Beer</i>	458
Directionally controllable compact pentacis dodecahedron speaker system with multichannel amplifier interface <i>Klaus Hobohm</i>	462
Development of a measurement system to determine human ear canal wall mechanical impedance in situ: Method and sensitivity of early prototype <i>Marius Benkert, Tobias Sankowsky-Rothe, Erwin Kuipers and Matthias Blau</i>	466
Compact Bio-inspired Sound Sensor System for Sound Source Localization Based on Interaural Time Differences <i>Steve Durstewitz, Christian Kehling, Stephan Werner, Tzvetan Ivanov and Claudia Lenk</i>	470
Connectivity of hearing aids and hearing systems <i>Hannes Seidler</i>	474
Low-Latency Pitch-Shifting with STN Decomposition <i>Maria Polak and Cumhuri Erkut</i>	476

## Electroacoustics and Audio Signal Processing 1

- New sound system in the old walls of Speyer Cathedral 480  
*Matthias Scheffe*
- TDOA-based localisation of horizontal loudspeaker arrangements 483  
*Klaus Hobohm, Constantin Kirsten and Markus Gembaczka*

## Electroacoustics and Audio Signal Processing 2

- Messung der Richtcharakteristik von Mikrofonen mit hoher Auflösung 487  
*Julian Ebert, David Ackermann and Stefan Weinzierl*
- Investigation of Electroacoustic Properties of Experimental Fibre-Optic Microphone Designs 491  
*Florian Klein, Christoph Ferdinand Hemeling, Andreas Männchen, Marvin Henkel, Daniel Beer, Thomas Kissinger and Joachim Bös*
- Development and production of a high-performance microspeaker for ANC headsets suited for voice communication in extremely noisy environments 495  
*Wolfgang Weith, Martin Birth, Roman Katzer, Lennart Reich and Robert Kaufmann*
- Enhancing sound quality in exciter-based sound Systems: The role of coupling element design 499  
*Philipp Neubauer, Pascal Köhler, Stephan Eisele, Karsten Moritz, Johannes Kerkmann, Robert Wick, Robert Joest and Dimitrios Patsouras*
- Air Leakage Detection for Pneumatic Drives using MEMS Microphones and Machine Learning 502  
*Christian Fuchs, Steffen Klein, Stefan Saller, Daniel Spies, Andreas Schütze and Tizian Schneider*

## Electroacoustics and Audio Signal Processing 3

- Lossless source coding using Hilbert-Huang transformation for multichannel data 506  
*Falko Bilz*
- NeuroSensEar: Neuromorphic acoustic sensing for the high-performance hearing aids of tomorrow 509  
*Claudia Lenk, Yuxuan He, Alirheza Hosseini, Fan Zheng, Aayushmi Mukherjee, Jakob Abeßer, Lina Jaurigue, Kathy Lüdge, Alexander Raake, Tzvetan Ivanov, Iko Pieper, Paul Fritzsche, Jan Küller, Daniel Beer, Stefan Schoeneich, Manuela Nowotny, Sebastian Uziel, Tino Hutschenreuther and Martin Ziegler*

## Flow Acoustics (Poster)

- A Comparison between Numerics and Experiments of an Enclosed Centrifugal Fan 513  
*Felix Czwielong, Patrick Heidegger, Christoph Heigl, Manuel Lauber, Florian Wachter, Eman Bagheri, Andreas Wurzinger, Marco Fritzsche, Lukas Tluczykont, Stefan Schoder, Manfred Kaltenbacher and Stefan Becker*
- Developing a digital twin of a human knee prosthesis for acoustic analysis 517  
*Andreas Wurzinger and Stefan Schoder*

## Flow Acoustics 1

- Investigation on Aerodynamic Noise Generated by Porous Coated, Staggered Tandem Cylinders 521  
*Paul Abromeit, Priyanka Raghuram, Thomas Geyer and Lars Enghardt*
- Noise Generation by Tandem Cylinders of Different Diameter in Cross-Flow 525  
*Thomas Geyer, Paul Abromeit and Maximilian Prügel*
- An initial assessment of porous metal foam liners for acoustic broadband damping 529  
*Fleming Kohlenberg and Karsten Knobloch*

## Flow Acoustics 2

Influence of Plate Material on the Attenuation Effect of Plate Resonator Silencers <i>Vincent Radmann and Ennes Sarradj</i>	533
Akustische Bestimmung der Porosität von additiv gefertigten dreifach-periodischen Mini-malfächenstrukturen <i>Dominik Grützner, Garvin Schultheiß, Benedikt Berchtenbreiter, Michael Sedlmajer, Markus Merkel and Stefan Becker</i>	537
Experimental Investigations on a large-scale Cockpit-Fuselage Model for Surface Pressure Fluctuations <i>Meike Jansen, Haley Naik, Karl-Stéphane Rossignol and Nan Hu</i>	541
Measurements of hydrodynamic and acoustic wall pressure fluctuations using ultra-thin-precision microphone <i>Nan Hu, Arnaud Le Floc'H and Karl-Stéphane Rossignol</i>	545
Boundary Layer Assessment of INTONATE Model <i>Haley Naik, Meike Jansen, Michael Mößner and Nan Hu</i>	549

## Flow Acoustics 3

Numerical Approaches to the Solution of Galbrun's Equation <i>Michael Buba, Marcus Maeder and Steffen Marburg</i>	553
Numerical study of installed distributed propeller noise using body-force models on cartesian grid <i>Jürgen Dierke, Roland Ewert and Jan W. Delfs</i>	556
Numerical Evaluation of the Unsteady Surface Pressure Attenuation due to Finite Sensor Size <i>Alexandre Suryadi, Michaela Herr, Roland Ewert and Johannes Kreuzinger</i>	560
Experimental and Numerical Assessment of Slat Cove Liners <i>Michael Pott-Pollenske, Meike Jansen and Jürgen Dierke</i>	564
On the acoustic boundary layer of a wall lining with turbulent grazing flow <i>Anita Schulz and Dirk Ronneberger</i>	568
Revisiting the BTGNX - Localization of Sound Sources in Tip-Gap Flow <i>Vladimir Lebedev, Jan W. Delfs, Philipp Dietrich, Andreas Lucius and Florian Lex</i>	572

## Generative Acoustic Design

*Structured Session, Organisation: Stefan Weinzierl and Michael Vorländer*

Curved-wall design for first-order reflections constrained to a sound pressure profile <i>Franz Zotter and Lukas Gölles</i>	576
Simulation and adjoint-based identification of a room acoustical benchmark case <i>Arne Hölter, Mathias Lemke and Stefan Weinzierl</i>	580
Neural Operators for the Design of Acoustic Metamaterials <i>Johannes D. Schmid, Jakob Wagner and Steffen Marburg</i>	584
Robust Multiobjective Optimization of Loudspeaker and Microphone Positions for Active Noise Control Systems in Propeller Aircraft <i>Kay Kochan</i>	588

## Innovations in Urban Development to Reduce Traffic Noise

*Structured Session, Organisation: Christian Popp, Michael Jäcker-Cüppers and Hans Bendtsen*

Data-Driven Track Condition Analysis via Airborne Sound Monitoring in Tram Track Systems <i>Sophie Falkenstein, Mikolaj Czuchaj, Ennes Sarradj, Simon Thom and Luca Thomma</i>	592
Assessing Pro-environmental Noise Behaviour and its Role in Road Traffic Noise Reduction <i>Martin Czuka, André Fiebig, Marco Conter, Cleopatra Christina Moshona, Michael Chudalla and Fabio Strigari</i>	596

Green buildings in Urban Noise Control: Forecast Model 2050 <i>Rumeysa Evli-Fründt, Wolfgang M. Willems and Alexander Maryniak</i>	600
Berliner Pilotprojekt zum testweisen Einsatz eines Lärmblitzers <i>Maike Diechmann, André Fiebig and André Mundt</i>	603
Stadtweite systematische Analyse für leiseren Verkehr in der Nacht in Berlin (Lärmaktionsplan Berlin 2024 - 2029) <i>Dorothea Salz, Manuel Frost and André Mundt</i>	606

## Methods for Technical and Perceptual Evaluations of Hearing Devices 1

*Structured Session, Organisation: Valentina Zapata-Rodriguez and Axel Ahrens*

An experimental setup for the estimation and emulation of bone and air conducted components of one's own voice <i>Rouben Rehman, Simon Kersten and Janina Fels</i>	610
---	-----

## Modeling of Flow-Induced Sound 1

*Structured Session, Organisation: Stefan Schoder and Florian Krömer*

Predicting Propeller Tonal Noise with AI trained First-Principle Models: A Novel Methodology <i>Jatin Manghnani, Roland Ewert and Jan W. Delfs</i>	613
---	-----

## Modeling of Flow-Induced Sound 2

*Structured Session, Organisation: Stefan Schoder and Florian Krömer*

CFD-CAA Simulation of Geometrically Resolved Porous Trailing Edge <i>Johannes Kreuzinger, Innokentiy Kursakov and Florian Schwertfirm</i>	617
CAA/CFD based Noise Prediction for Wind Turbines affected by Leading-Edge Erosion <i>Christina Appel and Clara Guembel</i>	621
Simulative Evaluation of the Whistling Potentiality of Pinhole Apertures <i>Jan Boysen, Andreas Wurzinger, Sven Olaf Neumann and Stefan Schoder</i>	625
Development of an Evaluation Methodology for Low-Frequency Flow Phenomena <i>Laura Breitenbücher, Andreas Wagner, Thomas Wiegand and Maarten Brink</i>	629
Prospects of Low-Noise-By-Design Approach for Airframe Components using the Lattice Boltzmann Method <i>Malav Soni, Roland Ewert, Michael Pott-Pollenske and Jan W. Delfs</i>	633

## Musical Acoustics

Is there a consistent effect of cross-fingering on the timbre of recorders? <i>Michael Haverkamp</i>	637
Experimental investigation into the reed structure and articulation modes of the western Chinese instrument Hulusi <i>Yang Xia and Rolf Bader</i>	641
This is what the Middle Ages sound like - Methods and principles for the restoration of historical bells <i>Michael Plitzner and Andreas Rupp</i>	645
Effects of a modified tailpiece and bridge on vibrometer measurements of a violin <i>Patrick Kontopidis, Simon Linke, Rolf Bader and Ralf Schumann</i>	649
Improvements to a Multi-Modal Playback Device for Violin Sounds <i>Friedrich Beyer, Tom Wühle and M. Ercan Altinsoy</i>	653
Comparison of Synthesis Approaches for a Hybrid 3-voiced Styrian Harmonica <i>Stephan Hohensinner and Matthias Frank</i>	657

## Musical Acoustics (Poster)

- Cheesy music: not just a matter of taste 661  
*Elina Nurkkala, Craig Stuart Carlson, Anu Hopia and Michiel Postema*
- A Martinetta sounds better - 50 years of pulse forming synthesis 664  
*Christoph Reuter and Holger Schefczik*
- The Dual Membrane System of the Persian Tar 668  
*Fabio Zamboni, Alireza Moradpour and Rolf Bader*

## Noise Assessment 1

- Vergleich der Fluglärm-Rechenverfahren AzB und BUF 672  
*Till Raitor and Jason Blinstrub*
- Global sensitivity analysis of the Doc. 29 aircraft noise model 676  
*Marie-Luise Lautsch, Tobias P. Ring and Sabine C. Langer*

## Noise Assessment 2

- Intersection Takeoffs and their noise impact around the BER airport 680  
*Nihal Sari and Kai Johannsen*
- On the development of aircraft noise levels from the example of Munich Airport 683  
*Felix Will and Amélie-Céline Weseloh*
- Influence of a measurement threshold level on the calculation of aircraft sound exposure levels 686  
*Jason Blinstrub, Berthold Vogelsang and Rainer Schmid*
- Validation of Sound Absorption Coefficients for Tyre-Road Noise Prediction 690  
*Fabio Strigari*

## Noise Assessment 3

- Development of an Online Dynamic Noise Mapping Application 694  
*Erik Thysell and Michelle Herlufsen*
- Identification and Prioritisation of Noise Hotspots 696  
*Sebastian Eggers, Mirco Bachmeier and Vincent Eweler*
- Impulsive Sound 700  
*Till Kühner*
- Damage Risk Criteria for Impulse Noise: How Robust Are They Against Measurement Specifications? 704  
*Marian Weger*

## Noise at the Work Place (Poster)

*Structured Session, Organisation: Sandra Dantscher and Helga Sukowski*

- Development of a systematic measurement program for noise at welding workplaces 708  
*Andrea Wolff, Heiko Kusserow and Ronald Leidlo*
- Qualification for Reliable Free-Field Calibration by Substitution of Sound Level Meters in Ultrasonic Frequency Range 710  
*Raphaël Gillioz and Andrea Wolff*
- Development of a measurement apparatus to capture the noise exposure caused by wearing headsets in trade sector - Introducing VINCENT 714  
*Jan Selzer, Zoltán Lampert, Florian Schelle, Andrea Wolff and Frank Rokosch*
- Housing design for medical imaging systems: A comprehensive approach to acoustic and vibro-acoustic optimisation 717  
*Niklas Thoma and Elmar Woschke*

## Noise at the Work Place 1

*Structured Session, Organisation: Sandra Dantscher and Helga Sukowski*

- Relating Dimensioning Functions in Room Acoustic Standards for Noise Control to their Goals: A Classification and Simulation Analysis 721  
*Thomas Ziegler*
- Acoustically Controlled Components for Building Ventilation 725  
*Peter Brandstät, David Goecke and Noemi Herget*
- The influence of the acoustic environment on ratings during different work tasks in the same virtual office 729  
*Jan Selzer, Florian Schelle and André Fiebig*
- Schweissen - die unterschätzte Gefahr für das Gehör 733  
*Beat Röllin*
- Individual Case or a More General Problem? Investigating Altered Localization Cues with Different Level-Dependent Hearing Protection Devices Concerning Worker Safety 736  
*Sina Buchholz, Steven van de Par, Rainer Huber and Jan Rennies-Hochmuth*

## Noise at the Work Place 2

*Structured Session, Organisation: Sandra Dantscher and Helga Sukowski*

- Command and Conquer: Towards a Robust Inventory of Voice Commands for HMI in Factory Halls 740  
*Sara Pearsell and Oliver Niebuhr*

## Noise Control (Poster)

- Pilot study on neural virtual sensing for active noise control 744  
*Felix Holzmüller and Alois Sontacchi*
- Verkehrsrgeräusche militärischer Fahrzeuge beim Fahren im Gelände 748  
*Karl-Wilhelm Hirsch*

## Noise Control 1

- Assessment of noise to be expected at machine workstations using simulation techniques of geometric acoustics 752  
*Ronny Herzog, Manfred Hess and Wolfgang Probst*
- Development of data-models of machines for the calculation of noise exposure at workplaces 754  
*Wolfgang Probst*
- Acoustic Considerations within a Tendering Procedure for the Construction and Upgrading of Military Firing Ranges 756  
*Christian Kleinhennrich, Philipp Bechtel and Karl-Wilhelm Hirsch*

## Noise Control 2

- Acoustic condition of new noise barriers 760  
*Arved Thies, Christian Schulze, Michael Chudalla and Fabio Strigari*
- FEM-based framework for the simulation of acoustic noise barriers 764  
*Jonathan Nowak and Andreas Fuchs*
- Proof of usability for noise barriers with laminated safety glass along railway lines 768  
*Jenny Böhm and Immanuel Wojan*

## Noise Control 3

Influence of foam-resin lining on the reflections and scattering of acoustic modes at pylons in a flow duct <i>Ulf Tapken and Maximilian Behn</i>	771
Numerical position optimization approach for sensor and actuator placement in an active noise cancelling system <i>Tim Karl and Delf Sachau</i>	775
Impact of Perceptual Error Shaping in Active Noise Control Across Signals with Diverse Spectral Tilt <i>Christian Blöcher, Alois Sontacchi and Thomas Hatheier</i>	779
Optimized Acoustic Properties of Perpendicular and Parallel Assemblies <i>Tao Yang, Marcus Maeder, Yu-Hao Chang, Jonas M. Schmid and Steffen Marburg</i>	783

## Noise Effects in Children

*Structured Session, Organisation: Julia Seitz and Kerstin Persson Waye*

Noise and Reverberation Impair Phoneme Perception in Children More Than in Adults <i>Maaïke van Eeckhoutte, Regitze Ardenkjær-Husted and Torsten Dau</i>	786
The perception of aircraft noise and its impact among children <i>Susanne Bartels, Julia Quehl and Daniel Aeschbach</i>	789
A Questionnaire Suitable to Assess Listening Effort in Children and Adults <i>Julia Seitz and Janina Fels</i>	793

## Noise Generation and Propagation

Assessing Tyre-Road Noise: Insights from Texture Analysis and Acoustic Characterisation <i>Philipp Cohrs and Esther Chevalier</i>	794
Frequency- and angle-dependent source models of muzzle blasts close to the gun <i>Philipp Bechtel, Christian Kleinhennrich and Karl-Wilhelm Hirsch</i>	798
Substitute Sound Sources - Application in the Calculation of Sound Propagation <i>Wolfram Bartolomaeus</i>	802
Cross-Spectral Analysis of Gradient-coil Induced Vibration and Sound in Low-field MRI System <i>Janusz Piechowicz and Swapnil Arawade</i>	806

## Numerical Acoustics (Poster)

Dynamic Spatial Discretization of Sound Field Calculation of Arbitrary Shaped Sources via Generalized Ray Theory <i>Sebastian Stahl, Mario Wolf, Elfgard Kühnicke, Emanuel Leipner and Christian Kupsch</i>	809
Influence of damping layers in locally resonant acoustic metamaterials on sound barrier performance <i>Dominik Mayrhofer, Felicitas Spörk and Manfred Kaltenbacher</i>	812
Exploring the Use of Masking Effects in a Multi-Level Simulation Framework for Efficient Prediction of Perceived Sound <i>Mingli Zhu, Tobias P. Ring and Sabine C. Langer</i>	816

## Numerical Acoustics 1

Error Analysis of Boundary Conditions Using Volume Penalization in Acoustic Simulations <i>Yannick Schubert and Mathias Lemke</i>	820
Computationally Efficient Virtual Sensing Method for Exterior Vibroacoustics Using a Time-Domain Finite Element Model with Perfectly Matched Layers <i>Luyao Dong, Yinshan Cai, Hervé Denayer and Elke Deckers</i>	824

## Numerical Acoustics 2

Isogeometric analysis of acoustic-structural coupled systems <i>Ahmed Mostafa Shaaban and Steffen Marburg</i>	828
Simulation of sound radiation from vibrating surfaces using approximation methods <i>Marius Walther, André Gerlach, Marko Liebler, Christoph Haugwitz and Mario Kupnik</i>	831
The effects of uniform motion on the sound radiation directivity of train wheels <i>Péter Fiala and Péter Rucz</i>	835
Adjoint-based identification of moving sound sources considering rigid walls <i>Mario Sroka, Ennes Sarradj and Mathias Lemke</i>	839
Predicting the Insertion Loss of Complex Noise Barrier Shapes Using a Versatile Numerical Testing Suite (2D) <i>Alexander Kittel</i>	843

## Numerical Acoustics 3

Inverse Acoustic Characterization of Rigid Porous Media using Artificial Neural Networks <i>Stefan Buchner, Marcus Wagner and Christoph Höller</i>	847
Integrating Neural Networks with Boundary Element Methods for Robust Sound Field Calculations <i>Simone Preuss, Johannes D. Schmid, Lukas Maicher and Steffen Marburg</i>	851
Data-Driven Anomaly Detection of Powder Bed Fusion with Acoustic Emission Data <i>Yaxiong Ren, Peter Gross, Linghong Zhang, Robert Feldmann, Matthias Weigold and Tobias Melz</i>	855
Optimizing acoustic system simulations with Bayesian Neural Networks (BNN): Reducing computational effort through intelligent sampling <i>Arne Hildenbrand and Steffen Marburg</i>	859
Insights Into Automated Quality Inspection in Lightweight Additive Manufacturing Using Machine-Learning With Measured and Simulated Acoustic Emissions <i>Sören Keuchel, Thorben Schröder, Cristiano De Boni, Peter Gross, Olena Prianychnykova, Yaxiong Ren, Alexander Fritz, Italo Balestra, Johannes Schötz, Peter Hofmann, Hannes Marckmann, Ömer Faruk Yildiz, Olgierd Zaleski, Rene Fassbender and Matthias Weigold</i>	862
Vibroacoustic Metamaterial Design via Deep Reinforcement Learning <i>Semere Birhane Gebrekidan, Marcus Maeder, Florian Toth and Steffen Marburg</i>	866
Modeling cut-out resonators as mass-spring oscillators for plate-type metamaterials <i>Mehmet Sait Özer, Stefan Fischer and M. Ercan Altinsoy</i>	870

## Ocean Acoustics (Poster)

<i>Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm</i>	
Detection of radiation-relevant areas using various numerical methods, measurements and sound source types <i>Ralf Burgschweiger, Ingo Schäfer, Arne Stoltenberg, Delf Sachau and Jan Ehrlich</i>	874
Distributed passive SONAR systems for target localization <i>Ralf Burgardt, Finn Röhrdanz, Marco Driesen, Karoline Gussow, Frederik Kühne, Arne Schulz and Gerhard Schmidt</i>	878
Computationally efficient Prediction of Underwater Noise from Offshore Pile Driving using an equivalent line array <i>Khyati Chaudhari, René Smidt Lützen, Frieder Lucklum, Vicente Cutanda Henriquez and Jonas Brunskog</i>	882
Ship Model for Machine Learning Based Ship Signature Classification <i>Patrick Nowak, Delf Sachau and Anton Homm</i>	886

## Ocean Acoustics 1: Ships, Noise and Propagation

*Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm*

- Waterborne sound of underwater detonations in very shallow water 889  
*Christian Haak and Jan Abshagen*
- Prediction of underwater noise from rock blasting for extension of Nuuk Harbour 892  
*René Smidt Lützen and Fernando Sáez Sanchez*

## Ocean Acoustics 2: Ships, Noise and Propagation

*Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm*

- Analysis of hydroacoustic ship signatures in multipath environments by cepstral F statistics 896  
*Andreas Galka, Alexandra Schäfer and Arne Schulz*
- Classification of Vessel Types by Means of Machine Learning 900  
*Konstantinos Karatziotis, Karoline Gussow, Viktoriia Boichenko, Christian Kanarski, Bastian Kaulen, Frederik Kühne, Marco Driesen, Finn Röhrdanz, Lukas Schirmer, Ralf Burgardt and Gerhard Schmidt*
- Acoustic-magnetic signatures of vessels 904  
*Lukas Schirmer, Martin Rosner, Moritz Boueke, Bastian Kaulen, Marco Driesen, Christian Kanarski, Finn Röhrdanz, Konstantinos Karatziotis, Frederik Kühne, Ralf Burgardt, Viktoriia Boichenko, Karoline Gussow and Gerhard Schmidt*
- Active Structural Acoustic Control at the motor cover of a mission field vehicle 908  
*Michael Dominik Clasen, Jan Luca Hamschmidt and Delf Sachau*

## Ocean Acoustics 3: Ships, Noise and Propagation

*Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm*

- Comparison of Actuator Concepts for reducing Sound Reflection from an Underwater Surface 912  
*Kevin Hostombe, Johannes Timmermann and Delf Sachau*
- Experimental Investigation of Acoustic Emissions from a Ship Hull 916  
*Alexander Schulz, Kai Simanowski, Delf Sachau and Anton Homm*
- Charakterisierung der Dämpfungseigenschaften von akustischen Dämmmatten in einer Unterwassertankumgebung 920  
*Christian Kanarski, Bastian Kaulen, Frederik Kühne, Marco Driesen, Karoline Gussow, Finn Röhrdanz, Konstantinos Karatziotis, Lukas Schirmer, Ralf Burgardt, Viktoriia Boichenko and Gerhard Schmidt*
- Underwater flow noise experiments with layered plate structures 924  
*Jan Abshagen*

## Ocean Acoustics 4: Sonar & Underwater Communication

*Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm*

- Design of a Cost Function for the Evaluation of Different SONAR Modes 927  
*Karoline Gussow, Bastian Kaulen, Frederik Kühne, Christian Kanarski, Finn Röhrdanz, Marco Driesen, Konstantinos Karatziotis, Lukas Schirmer, Ralf Burgardt, Viktoriia Boichenko, Erik Mackensen, Dirk Meyners, Eckhard Quandt and Gerhard Schmidt*
- DAS - acoustical measurements inside different environments 931  
*Finn Reikowski, Max Görler and Ivor Nissen*
- Real-time Framework for SONAR Ocean Simulation 935  
*Viktoriia Boichenko, Christian Kanarski, Bastian Kaulen, Frederik Kühne, Marco Driesen, Karoline Gussow, Finn Röhrdanz, Konstantinos Karatziotis, Lukas Schirmer, Ralf Burgardt and Gerhard Schmidt*
- Short-Term Ship Trajectory Classification Based on AIS Data 939  
*Torben Kannengießner, Finn Röhrdanz and Gerhard Schmidt*

Selected System Aspects for the Design of SONAR Nodes in a Multistatic Surveillance Network <i>Marco Driesen, Frederik Kühne, Karoline Gussow, Bastian Kaulen, Christian Kanarski, Finn Röhrdanz, Konstantinos Karatziotis, Lukas Schirmer, Ralf Burgardt, Viktoriia Boichenko, Erik Mackensen, Dirk Meyners, Eckhard Quandt and Gerhard Schmidt</i>	943
---	-----

## Ocean Acoustics 5: Sonar & Underwater Communication

*Structured Session, Organisation: Jan Abshagen, Ivor Nissen, Gerhard Schmidt and Anton Homm*

Bio- and Eco-friendly Acoustical Underwater Communication (Networks) <i>Ivor Nissen</i>	947
Data Generation for Training of Neural Networks Dealing with Underwater Speech Transmission <i>Finn Röhrdanz, Tim Owe Wisch, Konstantinos Karatziotis, Karoline Gussow, Viktoriia Boichenko, Christian Kanarski, Bastian Kaulen, Frederik Kühne, Marco Driesen, Lukas Schirmer, Ralf Burgardt and Gerhard Schmidt</i>	951
Collaborative Relative Positioning in Underwater Environments Using Acoustic Communication and Two-Way Ranging <i>Semir Cömertpay, Gerhard Bauch, Dennis Galsdorf and Ivor Nissen</i>	955

## Outdoor Sound propagation (Poster)

*Structured Session, Organisation: Elena Shabalina, Christoph Pilger and Andreas Fischer*

Whistling Winds on Gridded Grounds: Acoustic Insights into Resonant Phenomena <i>Sebastian Kümmeritz and Michael Kerscher</i>	959
Data-Driven and Physics-Informed Machine Learning for Outdoor Acoustic Wave Modeling using the Linearized Euler Equations <i>Hessel Juliust, Katharina Baumann, Arthur Schady, Sirine Gharbi and Felix Dietrich</i>	963

## Outdoor Sound Propagation 1

*Structured Session, Organisation: Elena Shabalina, Christoph Pilger and Andreas Fischer*

On solving the (convected) Helmholtz equation in terms of Xi <i>Ysbrand Wijnant</i>	967
Validation of a simplified higher-order diffraction model in urban environments <i>Pascal Palenda, Christoph Kirsch, Stephan D. Ewert and Michael Vorländer</i>	970
Phase error sensitivity to the inversion strength and depth of the boundary layer in a conventionally neutral regime <i>Pierangelo Libianchi and Elena Shabalina</i>	971

## Outdoor Sound Propagation 2

*Structured Session, Organisation: Elena Shabalina, Christoph Pilger and Andreas Fischer*

Determination of bidirectional scattering coefficients from measured scattering patterns <i>Anne Heimes, Denis Cabrera and Michael Vorländer</i>	975
Minimal Beamforming at Very Low Frequencies <i>Henri Siller, Wolfram Hage and Timo Schumacher</i>	978
Auralization of Vehicle Pass-By Using Impulse Responses of Dynamic Urban Environments <i>Chalotorn Möhlmann, Lukas Aspöck and Janina Fels</i>	982
Standard-Compliant Sound Immission Forecasts for Open-Air Music Events <i>Janosch Blaul, Stefan Feistel, Tobias Goldmann and Andreas Nicht</i>	983
Acoustic effect of absorbing embankments as noise barriers <i>Sebastian Köper, Sebastian Eggers, Folkard Hänisch, Andreas Fuchs and Manfred Haider</i>	986

## Physical Acoustics (Poster)

Rheologische One-Way-Wellengleichungen <i>Hans-Joachim Raida</i>	990
Estimation of piezoelectric material parameters under varying electric field conditions <i>Olga Friesen, Lars Meihost, Kevin Koch, Leander Claes and Bernd Henning</i>	994
Modelling band structure properties using physics-informed machine learning <i>Aneta Furmanová and Viktor Hruška</i>	998
Efficient sensitivity analysis of classical Helmholtz resonators based on polynomial chaos expansion <i>Philipp M. Heck and Sabine C. Langer</i>	1001

## Physical Acoustics 1

Experimental investigation into the properties of an acoustic laboratory setup to replicate the sound radiation model of a simply supported plate in a rigid baffle <i>Steffen Ungnad and Delf Sachau</i>	1005
Assessment of Fibre-Matrix Adhesion in Reinforced Polymers by Modal Damping of Guided Acoustic Waves <i>Leander Claes, Henning Zeipert, Philipp Brandes, Elmar Moritzer and Bernd Henning</i>	1009
Self-similarity of free vibration decays in cantilever beams <i>Christian Adams and Sebastian Oberst</i>	1013

## Physical Acoustics 2

3D Acoustic Metamaterial Using Interconnected Helmholtz Resonators <i>Frieder Lucklum</i>	1017
Study of the wide-band viscous sound absorption behavior of lattices of rigid cylinders <i>Vicente Cutanda Henriquez, Martin A. Ibarias and José Sánchez-Dehesa</i>	1021
One-Way-Theorie, DAGA-Bibliographie 2025 <i>Hans-Joachim Raida</i>	1025

## Physiological Acoustics (Poster)

Nonlinear Outer Hair Cell Model: Temporal Modulation <i>Sebastian Handel, Martin Hagmüller, Linda Lüchtrath and Gernot Kubin</i>	1029
Brainstem Responses to High- and Low-Level features of Musical Melodies and their Relation to Reverse Hierarchy Theory <i>Benedikt Hartmann, Helmut Riedel and André Rupp</i>	1033
Investigating Speech Intelligibility While (Un)Knowingly Listening Through Transparent Hearing Aids <i>Luca Wiederschein, Malte Wöstmann, Florian Denk, Markus Kemper and Hendrik Husstedt</i>	1037
Evaluating Mobile EEG Outcomes for Real-World Listening Effort Estimation <i>Helen Wolf, Payam Shahsavari Baboukani, Kasper Eskelund, Jens Hjortkjær and Emina Alickovic</i>	1041

## Physiological Acoustics 1

Numerical simulation of the sound pressure level distributions at the entrance of individual external ears <i>Nele Hauenschield, Reinhild Roden and Matthias Blau</i>	1045
--	------

## Physiological Acoustics 2

- Classifying the Direction of Auditory Attention from EEG Signals Using Deep Learning with a Short Decision Window 1049  
*Maryam Bajool and Bernhard U. Seeber*
- Influence of daily exposure time evaluation methods on exposure-response relations for vibration-induced white finger 1053  
*Magdalena Scholz, Anthony Brammer and Steffen Marburg*

## Psychoacoustics (Poster)

- Pupil-linked arousal responses during rapid online perceptual belief updating across auditory domains 1055  
*Roman Fleischmann, David Meijer, Burcu Bayram, Ulrich Pomper, Michelle Spierings and Robert Baumgartner*
- Perception of Voice and Room Acoustics by Lecturers and Students: A Case Study at the University of Vienna 1058  
*Sarah Ambros, Christoph Reuter and Sebastian Kraync*
- The young have the power to dream, the old the wisdom to guide: sounding charismatic depends on which generation is listening 1061  
*Ío Valls-Ratés and Oliver Niebuhr*
- Localization Tests on Restoring Spatial Hearing in ANC Headphones: Method and Results 1065  
*Esther Sachau, Florian Ernst and Delf Sachau*
- The Impact of Everyday Distractor Sounds in the Sustained Attention to Response Task 1069  
*Michiel Geluykens, Herbert Müllner, Vojtech Chmelik and Monika Rychtarikova*

## Psychoacoustics 1

- Machine Hearing with Auditory Images to Mimic Human Ratings on Product Sounds 1073  
*Michael Kuka and Michael Fischer*
- Railway Psychoacoustic Annoyance: Custom Time-varying Psychoacoustic Metric Design with CRNNs 1077  
*Jonas Egeler and Christine Huth*
- Simulating Relative Masking Levels for Narrowband Chirp Stimuli using the Computational Auditory Signal Processing and Perception (CASP) Model 1080  
*Emmelie Knauth, Jan Hots and Jesko Verhey*
- Considerations in modeling the nonlinearity of human hearing for loudness perception 1083  
*Julian Becker, Roland Sottek, Tao-Li Liu and Moritz Bender*
- Evaluating the use of deep learning to predict temporal anomalies in acoustic signals 1087  
*Alokeparna Ray, Thiago Lobato and Andreas Herweg*

## Psychoacoustics 2

- Using interaural mistuning for modelling binaural processing inaccuracies in human speech recognition 1091  
*Simon Weihe, Jan Rennies-Hochmuth and Thomas Brand*
- Evaluating a Binaural Model Using Real-Time Assessment of Listening Effort in Human Listeners 1095  
*Martin Berdau, Daniel-José Alcalá Padilla, Jan Rennies-Hochmuth and Thomas Brand*

## Psychoacoustics 3

Understanding the Perception of Sharpness by Increasing the Loudness of a Sound <i>Srinath Srinivasan</i>	1099
Rumbling and humming as a function of loudness level <i>Martin Gottschalk and Jesko Verhey</i>	1102
Experimental study on sharpness and roughness sensations with varying source positions in the horizontal plane <i>André Fiebig, Felix Hochbaum and Fabian Brinkmann</i>	1104
On the validity and reproducibility of small-N psychoacoustical threshold measurements <i>Martin Hansen and Daniel Oberfeld-Twistel</i>	1108
Data on the detection of infrasound with both ears <i>Björn Friedrich and Jesko Verhey</i>	1112
A Binaural Cue Transformation Method to Preserve Spatial Release From Masking in Listeners With Impaired ITD Processing <i>Timm-Jonas Bäumer, Stephan Töpken, Richard C. Hendriks, Peyman Goli and Steven van de Par</i>	1116

## Psychoacoustics 4

Pitch strength for normal-hearing listeners and cochlear-implant users <i>Jesko Verhey, Hilmar Leyhausen, Benjamin Beyer, Ingo Siegert and Martin Böckmann-Barthel</i>	1120
---	------

## Psychoacoustics 5

How a Loudness Halving Affects the Perceptual Space for Tonal Fan Sounds <i>Jael Anina Masury, Eike Claaßen, Steven van de Par and Stephan Töpken</i>	1122
Group Listening Tests for Measuring Soundscape Evaluations under Laboratory Conditions <i>Michaela Marxt, Emma Trommer, Jan Krüger and Berndt Zeitler</i>	1126
Validation of psychoacoustic noise mapping <i>David Goecke and Ukki Trumann</i>	1130
A Framework for the assessment of affective sounds <i>Alexander von Hoffmann, Felix Enhuber, Jessica König and Tom Schmid</i>	1134
Manipulation of Acoustic Properties to Guide Attention in Auditory Augmented Reality <i>Max Stelzenmüller, Lukas Treybig, Georg Stolz and Stephan Werner</i>	1138

## Room Acoustics (Poster 1)

When is the sky the limit? Multi-dimensional room acoustic analysis of auditoria: The height dimension of concert halls and opera houses <i>Klaus-Hendrik Lorenz-Kierakiewitz, Christoph Reuter, Benjamin Pfändner and Chris Berna Erkal</i>	1142
Room acoustics of three Romanesque churches in the Rhineland - similarities, differences, characteristics <i>Klaus-Hendrik Lorenz-Kierakiewitz, Chris Berna Erkal and Patrick Hilland</i>	1146
Biodegradable sound absorber panels <i>Jürgen Tchorz, Chantalle Geerdes and Frederic Willems</i>	1150
Effects of the presence of an audience on sound field parameters in a church used as a concert venue <i>Roman Kiyon, Benjamin Pries, Stephan Preihs and Jürgen Peissig</i>	1153
Acoustic Characteristics of Gugak (Korean Music) Instruments and Practice Rooms <i>Youngsun Kim, Mina Kim, Jiyoung Oh and Jeongho Jeong</i>	1157

## Room Acoustics (Poster 2)

- A Comprehensive Room Impulse Response Database for Spatial Audio 1161  
*Egke Chatzimoustafa, Jonas Heck, Dominik Patek and Peter Jax*
- Assessment of factors affecting speech in ICU wards 1165  
*Conn Aiken, Per Hiselius, Maria Quinn, Emma Arvidsson and Cheol-Ho Jeong*

## Room Acoustics 1

- Input data and geometrical details for room acoustic simulations 1169  
*Cheol-Ho Jeong, Yuanxin Xia, Yun Ho Seo, Ólafur Hafstein Pjetursson, Emma Arvidsson and Per Hiselius*
- Validation study of broadband wave-based acoustic simulations and binaural renderings 1173  
*Steinar Guðjónsson, Hermes Sampedro Llopis, Matthias Cosnefroy and Haukur Hafsteinsson*
- Experimental in situ estimation of the acoustic boundary impedance 1177  
*Jonas M. Schmid, Johannes D. Schmid and Steffen Marburg*

## Room Acoustics 2

- Reuse of End-of-life Wind Turbine Blade Components as Sound-absorbing Acoustic Ceilings - Initial Concept 1181  
*Michael Kucher, Martin Dannemann, Philipp Johst, Dimitrij Seibert and Robert Böhm*

## Room Acoustics 3

- Objektiv-technische und künstlerische Perspektiven der Konzertsaalakustik - Ein Vergleich messbarer Parameter und zeitgenössischer subjektiver Wahrnehmungen 1185  
*Lukas Bruggaier*
- On the impact of loudspeaker nonlinearities on room acoustic measurements 1187  
*Finn Agerkvist*
- Modifying a Wall Transmission Suite to Measure Diffuse Field Sound Absorption Coefficients - A Case Study 1191  
*Georg Bäumler and Christoph Höller*
- Room acoustic measurements in a swimming hall at different atmospheric conditions 1195  
*Jens Holger Rindel*

## Room Acoustics 4

- The role of analytical models and simulation tools on reverberation time prediction. Do they properly work? 1199  
*Marco Caniato and Federica Bettarello*
- Practical Application of ISO 22955 for Acoustic Design in Open-Plan Offices 1203  
*Eva Wassermann*
- Psst! Listening Conditions in Museums for Musical Instruments 1207  
*Gabriel Feller and Christoph Reuter*
- On the Room Acoustics of Two Reactivated Hypar Shell Buildings at Magdeburg and Templin 1211  
*Tobias Behrens and Wolfgang Ahnert*
- On the Acoustics of the Central Rooms in Sans Souci Palace in Potsdam 1214  
*Klaus-Hendrik Lorenz-Kierakiewitz*

## Room Acoustics 5

On the perception of room acoustics from the perspective of musicians: an empirical field study <i>Silvia Schmidt, Emanuele Porcinai, Paula Klein, Steffen Lepa and Stefan Weinzierl</i>	1218
Concrete solutions: The acoustic design of a music school <i>Clemens Frischmann and Jamilla Balint</i>	1222
Applicability of Common Room Acoustic Parameters for Music Recording Spaces in Recording Studios <i>Jakob von Lauer-Münchhofen, Markus von Berg and Jochen Steffens</i>	1224
Algorithmic variations of acoustic materials and shapes implementation in the interior space for room acoustics optimization <i>Zlatka Madzharova and Radul Shishkov</i>	1228
Evaluating a Mobile App for Reverberation Time Measurements: Are valid values at your fingertips? <i>Stefan Weigand, Lukas Pendzich, Florian Fordermaier, Jasmin Hörmeyer and Jochen Schaal</i>	1232

## Soundscape

The soundscape index <i>Christer P. Volk, Michelle Herlufsen and Torben Holm Pedersen</i>	1236
From Text to Soundscape. Acoustic Perception and Preferences in Early Viennese Concert Halls around 1800 <i>Meret Lu Stellbrink, Steffen Lepa and Stefan Weinzierl</i>	1240
No more wet paper: Digitizing the Soundwalk Questionnaire - The Soundwalk-Web-App <i>Iwer Petersen</i>	1244
Variance-maximizing acoustic dimensions for machine learning-based soundscape assessment <i>Jakob Bergner, Draško Mašović, Christoph Sladeczek and Joachim Bös</i>	1248

## Soundscape (Poster)

How is soundscape perception, evaluated by soundwalks, impacted by urban development activities? <i>Sebastian Köper, Dagmar Rokita and Friedrich Ueberle</i>	1252
The WikliNathi Longterm Soundscape Monitoring Project <i>Cornelius Pöpel and Bernd Edler</i>	1256
MEMOSOUND - Mechanistic pathways of memory retrieval from urban soundscapes <i>Margret Sibylle Engel and M. Ercan Altinsoy</i>	1260

## Speech Processing (Poster)

DOAVINCI: Direction of Arrival based Videoconferencing Incorporating Neural Networks for Increased Conversational Intelligibility <i>Nils Poschadel, Stephan Preihs and Jürgen Peissig</i>	1263
Evaluation of Short-Term Features for Online Estimation of the A Priori Probability for Speech Absence in Multichannel Speech Presence Probability Estimators <i>Manuel Schalk and Stephan Herzog</i>	1267
Multilingual Listening Effort Prediction - LEAP goes international <i>Rainer Huber, Hannah Baumgartner and Jan Rennies-Hochmuth</i>	1271
Third-Party Listening Test as an Alternative to Conversational Tests <i>Stefan Bleiholder, Martin Spiertz and Frank Kettler</i>	1275

## Speech Processing 1

Automotive Hands-free Conversational Tests <i>Stefan Bleiholder, Nils Rohrer and Frank Kettler</i>	1279
Evaluating the Role of Engagement in Speech Quality Sensitivity: Insights from Active and Passive Listener Ratings <i>Robert Spang, Wafaa Wardah, Tuğçe Melike Koçak Büyüktaş, Kirill Shchegelskiy and Sebastian Möller</i>	1283
Perceptual Drift in Speech Quality: Re-assessing Listener Judgments a Decade Later <i>Wafaa Wardah, Maurizio Vergari, Robert Spang and Sebastian Möller</i>	1287
Assessing the Impact of Echo on Conversations in Real-Time Communication Systems <i>Tuğçe Melike Koçak Büyüktaş, Leon Schreiber, Robert Spang and Sebastian Möller</i>	1291
A Study on Voice Quality and Vocal Fatigue of Lecturers in Lecture Halls <i>Moritz Bender, Jamilla Balint and Janina Fels</i>	1294

## Speech Processing 2

Temporal Training Certificates in Crowdsourcing Multi-Dimensional Speech Quality Assessment <i>Kirill Shchegelskiy, Benedikt Schuh and Sebastian Möller</i>	1298
The future of speech quality evaluation in the presence of AI based implementations <i>Hans Wilhelm Gierlich</i>	1302
A Real-time Objective Speech Analysis Tool for Analysis of Impaired Speech <i>Karolin Krüger, Patricia Weede and Gerhard Schmidt</i>	1306
Comparison of reference-based and single-ended prediction models for perceived listening effort <i>Jan Reimes, Rainer Huber and Jan Rennies-Hochmuth</i>	1310

## Structure-Borne Sound and Vibration Technology 1

Comparison of Directly Measured and In Situ Determined Blocked Forces <i>Marcus A. Biehler and Jan Herrmann</i>	1314
A Bayesian Approach to Transfer Path Analysis <i>Weihan Shen, Ester Creixell-Mediante, Frieder Lucklum and Jonas Brunskog</i>	1317
Post-Construction Subway Noise Measurements <i>Niels Peter Moos, Jonas Brunskog and Rasmus Stahlfest Holck Skov</i>	1320
Acoustic optimization by targeted disturbances in the consistent track structure <i>Maximilian Mantel, Katja Stampka and Ennes Sarradj</i>	1324
Standardizing Vibration Emission Prediction for Rail Traffic: An Introduction to the New DIN 45672-3 Draft [1] <i>Lukas Böhm and Udo Lenz</i>	1328

## Structure-Borne Sound and Vibration Technology 2

Comparison of different approaches for Evaluating Structure-Borne Noise Emission of Axial Piston Units <i>Matthias Vogt and Marcus Geimer</i>	1332
On identifying boundary conditions of a beam <i>Hannes Häfner, Martin Schneider, Steffi Reinhold, Lucas Heidemann and Berndt Zeitler</i>	1336
Acoustic Characterization of Intramedullary Screw Fixation in Bone <i>Bianca Winter, Robert A. Kaufmann, Martin Schneider, Berndt Zeitler and Steffi Reinhold</i>	1340

Improving the energy efficiency of the detection of hip-stem implant loosening using structure-borne sound for an on-implant implementation <i>Nico Graumüller, Lisa Krukewitt, Daniel Kluess, Rainer Bader, Christian Haubelt, Sascha Spors and Christoph Niemann</i>	1344
---	------

Towards transmitting vibrotactile touch patterns over the tactile internet <i>Robert Kirchner, Robert Rosenkranz, Suresh Nuthalapati and M. Ercan Altinsoy</i>	1348
---	------

## Structure-Borne Sound and Vibration Technology 3

A Sensitivity Study Approach to Improve the Sound Transmission Loss Performance of Vibro-acoustic Metamaterials with Embedded Helmholtz Resonators <i>Kenneth Leung and Felix Langfeldt</i>	1351
--	------

Efficient model order reduction of a generic vibroacoustic model via multi-moment matching <i>Sebastian Schmidt, Yannik Hüpel, Ulrich Römer and Sabine C. Langer</i>	1355
---	------

## Structure-borne Sound and Vibrations (Poster)

Quantitative Acoustic Resonance Testing based on Synthetic Training Data <i>Matthias Heinrich, Ute Rabe, Florian Römer and Bernd Valeske</i>	1359
---	------

Preliminary Method Development of Loads and Vibration Measurement on an Aircraft Engine Pylon <i>Marco Norambuena, Vega Handojo, Ray Dewald and René Winter</i>	1363
--	------

Vibration Analysis of Gradient-coil in Low-field MRI System <i>Swapnil Arawade and Janusz Piechowicz</i>	1367
---	------

## Sustainability in Acoustics

*Structured Session, Organisation: Benjamin Müller, Sara Ljubijankic and Cheolho Jeong*

Sustainability in Building Acoustics <i>Sven Öhler and Mark Koehler</i>	1370
--	------

LCA-Driven Optimization of Acoustic Materials Selection <i>Eline Balland, Cheol-Ho Jeong and Naja Kastrup Friis</i>	1374
--	------

Development of Sound Absorbers from Renewable Raw Materials: Challenges and First Steps <i>Moritz Späh, Xiaoru Zhou, Christian Kaiser and Julia Weissinger</i>	1378
---	------

GreenAcoustics: Integration of sustainability indicators in room acoustic designs <i>Xiaoru Zhou, David Borschevski, Daniel Eckert and Ting Zhang</i>	1381
--	------

## UAM/UAS Noise Emission and Perception (Poster)

*Structured Session, Organisation: Gert Herold, Stephen Schade and Tobias Lade*

Concept for cabin noise assessment in the design phase of an aircraft <i>Daniel Knuth, Yannik Hüpel and Sabine C. Langer</i>	1385
---	------

## UAM/UAS Noise Emission and Perception 1

*Structured Session, Organisation: Gert Herold, Stephen Schade and Tobias Lade*

Soundwalking in Scilly: UAS Noise Impact on Remote Soundscapes <i>Marc Green and Antonio Torija-Martinez</i>	1389
---	------

Evaluating the Ground Noise Footprint of Urban Air Mobility Vehicles <i>Teresa Moses, Michael Schmähl and Mirko Hornung</i>	1393
--	------

Acoustic Metamaterials for electric Vertical Take-Off and Landing aircraft <i>Mert Dogu, Maaz Farooqui, Felix Kronowetter, Marcus Maeder and Steffen Marburg</i>	1397
---	------

A Comparative Study of Mesh Methods, Particle Methods and Analytical Models for Multi-Rotor Noise Generation <i>Tobias Lade, Thomas Guignard and Sébastien Guérin</i>	1400
Evaluation of Acoustic UAV Tracking Methods <i>Leon Paul Steinhoff, Jan Wagner and Carsten Spehr</i>	1404
<b>UAM/UAS Noise Emission and Perception 2</b>	
<i>Structured Session, Organisation: Gert Herold, Stephen Schade and Tobias Lade</i>	
Aspects of the in-flight noise measurements of a cargo UAV <i>Illia Peleshok, Michael Schmähl and Mirko Hornung</i>	1408
Strömungscharakterisierung und Untersuchungen von Mikrofonwindschutzvarianten zur On-Board Eigengeräuschmessung eines Multikopters (UAV) bei verschiedenen Flugsituationen <i>Julian Benz, Christoph Heigl, Felix Czwielong, Andreas Gründer, Jörg Franke and Stefan Becker</i>	1412
<b>Ultrasound</b>	
Focussed sound field of thermoacoustic transmitters <i>Mate Gaal, Majid Ahmadzadeh and Matthias Weise</i>	1416
<b>Ultrasound (Poster)</b>	
Tuning Squeeze-film Damping in an Air-coupled Electrostatic Ultrasonic Transducer by a Structured Cavity <i>Franziska Wall, Hermann Schenk, Anton Melnikov, Marcel Jongmanns and Jorge Mario Monsalve Guaracao</i>	1420
A setup dedicated to high-speed photography of ultrasound-generated microjets <i>Craig Stuart Carlson, Nicole Anderton, Momoka Yamasaku, Mamoro Hashimoto, Nobuki Kudo and Michiel Postema</i>	1424
Mobile Sensor Concept with Energy Harvesting through Focused Ultrasound Signals <i>Felix Grimm, Michael Simon, Stephan Adler and Ulrike Steinmann</i>	1427
<b>Vehicle Acoustics (Poster)</b>	
Cabin acoustics in preliminary aircraft design with propulsion pressure field excitation <i>Juliette Thoma, Jan W. Delfs, Stanislav Proskurov and Sabine C. Langer</i>	1431
Research on railway track acoustic management technology <i>Hyo-In Koh, Jiyoung Hong, Woo-Tae Jeong, Jenny Böhm and Haike Brick</i>	1435
<b>Vehicle Acoustics 1</b>	
An Investigation into the Dependence of Electric Motor Noise on Design Parameters <i>Dominik Ricardo Richter and Sebastian Hakansson</i>	1438
Analytical Model for Noise Prediction of Axial Flux Electric Machines <i>Erik W. Schneehagen, Jakob Hurst and Thomas Geyer</i>	1442
Studying the Influence of Parameters in a Lumped Tooth Force Based Noise Assessment of a Permanent Magnet Synchronous Machine <i>Sebastian Hakansson and Thomas Geyer</i>	1446
Influence of Rib Dimensions on the NVH Performance of Lightweight Gearbox Housings in an Electric Vehicle <i>Khadijeh Farshi, Sascha Ott and Albert Albers</i>	1450
Two-Way Coupled FSI Simulation of a Scroll Compressor with Reed Valve <i>Tobias Grauwogl, Lukas Saur and Stefan Becker</i>	1454

Small laboratory electric motor test rig for aircraft applications <i>Philipp Schulze, Jens Tatan, Ulrik Strehlau, Matthias Lang and Thomas Geyer</i>	1458
Evaluation of structure-borne and airborne noise in hydrogen-powered train engines <i>Braj Bhushan Prasad, Dmitriy Wintergoller, Tommy Luft and Hermann Rottengruber</i>	1462

## Vehicle Acoustics 2

Frequency-Domain-Based Parameter Identification of a Finite Element Vehicle Body in Vibroacoustics <i>Sophie Cram, Jiale Yu, Marinus Luegmair, Marcus Maeder and Steffen Marburg</i>	1466
Simulation Sensitivity Analyses to Design and Optimize Sound-Absorbing Underbody Panels <i>Youssef Gerges, Paolo Bordini, Federico Di Marco and Claudio Bertolini</i>	1469
Project Tyre Road Noise - Development of an Estimation Method for the Pass-by Noise <i>Gunnar Böttcher, Carolin Schliephake, Ventseslav Yordanov and Dominik Werner</i>	1473
Analyzing tire-road noise influences based on component level measurements <i>Carolin Schliephake, Kai Robert Neumann, Olaf Uszynski, Dominik Werner and Peter Urban</i>	1476
The Acoustics of the Low Thermal Stress Railway Freight Wheel <i>Martin Fehndrich</i>	1480

## Vehicle Acoustics 3

Noise Differences Between Electric and Conventional Cars at Low Speeds <i>Sascha S. Dahl, Jens Oddershede, Jonas Brunskog, Christer P. Volk, Maaike van Eeckhoutte</i>	1483
Assessing Pedestrian Behavior in Traffic: A Pilot Study on Real-World Time to Collision Estimations <i>Jonas Krautwurm and M. Ercan Altinsoy</i>	1487
Current Trends and Challenges in Acoustic Vehicle Alerting Systems (AVAS): A Holistic Approach to Future Solutions <i>Tim Kliem, Lukas Lübbert, Alessandro Fortino and Alexander Zirinidis</i>	1491

## Vehicle Acoustics 4

Generative AI-Driven AVAS Sound Design for Enhanced Pedestrian Safety and Sound Quality in Electric Vehicles <i>Simon Hemmers and Alessandro Fortino</i>	1495
Implementation of a synthesis tool for stationary and non-stationary interior noise of electric vehicles <i>Benedikt Bugl, Hans-Peter Rabl, Stephan Töpken, Eike Claaßen, Steven van de Par and Anna Rieger</i>	1499
Experimental Determination of the Masking Threshold in Electric Trucks <i>Berkay Kullukcu, Oliver Zeidler, Serkan Atamer and M. Ercan Altinsoy</i>	1503

## Virtual Acoustics & Binaural Technologies (Poster)

Analysis of Room Acoustic Measurements Indoors, Outdoors and In Between <i>Paul Popp, Lukas Treybig, Georg Stolz, Johannes Fried, Florian Klein and Stephan Werner</i>	1506
O'er all the hilltops Is loud now - Spatial acoustic measurement and dataset creation of the Goethehäuschen in Ilmenau <i>Sebastian Schwarze, Georg Stolz, Ihsan Ullah, Lorenz Knauder, Lukas Treybig, Tobias Schwandt, Wolfgang Broll and Stephan Werner</i>	1510
Methodology and tools selection for assessing the perceptual effects of sound source occlusion <i>Ileana Tatiana Surdu, Lukas Treybig, Florian Klein, Rakesh Rao Ramachandra Rao and Stephan Werner</i>	1513
Representation Learning in Complex-Valued Neural Networks for Sound Field Reconstruction <i>Vlad Paul, Nara Hahn and Philip Nelson</i>	1517

Low-Frequency Limit in Wave Field Synthesis for Virtual Point Sources <i>Gergely Firtha, Nara Hahn, Frank Schultz and Péter Fiala</i>	1521
<b>Virtual Acoustics 1</b>	
IIR Modeling of HRTFs in the Spherical Harmonic Domain <i>Nara Hahn</i>	1525
Towards a 3D morphable head and a pinna model for HRTF Individualization <i>Sanket Jain, Fabian Brinkmann, Jiawen Fan, Maximilian Kohlbrenner, Rainer Moeller and Stefan Weinzierl</i>	1529
Measuring Motion-to-Sound Latency with Motorized HATS <i>Maximilian Kentgens, Mihaly Barany, Jan Reimes and Hendrik Steingrobe</i>	1533
An Overview for Realizing an Acoustical Assistance System for Visually Impaired Climbers <i>Viola Isabella Schneider, Benedikt Bugl, Armin Sehr and Michael Niemetz</i>	1537
Design of a continuous line-source loudspeaker prototype <i>Monika Steinbäck, Lukas Gölles and Franz Zotter</i>	1541
<b>Virtual Acoustics 2</b>	
RAVEN Benchmark using the Loudspeaker Orchestra <i>Nils Rummler, Gülnihan Atay, Josep Llorca-Bofi and Michael Vorländer</i>	1545
Comparison of Noise Detection Methods for Exponential Sine Sweep Measurements <i>Georg Stolz, Stephan Werner, Lukas Treybig and Florian Klein</i>	1549
Investigation of the mutual importance of sound systems and room acoustics using methods of virtual acoustics <i>Alexander Lindau and Anton Kempe</i>	1553
Comparative Evaluation of Room Compensation Approaches in Ambisonics Reproduction <i>Timm-Jonas Bäumer, Steven van de Par and Ali Fallah</i>	1556
Spatial Resolution of Late Reverberation in Ambisonic Loudspeaker Playback <i>Matthias Frank, Lukas Gölles and Stefan Riedel</i>	1560
Efficient Acoustic Radiosity Modelling for Precise Bi-directional Reflectance Distribution Patterns <i>João Fatela, Anne Heimes and Michael Vorländer</i>	1564
<b>Virtual Acoustics 3</b>	
Determination of parameters for poroelastic materials using virtual models and physical testing <i>Boris Mondet, Mads Herring Jensen, María Mónica Ballesteros Villarreal, Lars Birger Nielsen, Frank Rasmussen and Lars Birger Nielsen</i>	1568
Railway Rolling Noise Synthesis Using a Numerical Modelling Approach <i>Christopher Knuth, Giacomo Squicciarini and David Thompson</i>	1572
Acoustic Driving Simulators in Virtual Vehicle Development: Sound and NVH Simulation Using Spatial Audio <i>Benjamin Hecker, Alessandro Fortino, Simon Hemmers and Berkem Yenigün</i>	1576
Possibilities and Limitations of a Game Engine and Middleware for Auralizing Virtual Acoustic Laboratories in VR <i>Michael Singer, Cornelius Pöpel and Benjamin Müller</i>	1580

## Waves in Solids

*Structured Session, Organisation: Leander Claes and Daniel A. Kiefer*

Longitudinal Ultrasonic Waves for Haptic Perception <i>Marko Liebler, Stefanie Wiedemann-Lang, Volker Groß and Heiner Storck</i>	1584
Determination of the unit cell geometry in fibre-reinforced polymer sheets using guided acoustic waves <i>Mareen Wippermann, Leander Claes, Philipp Brandes, Elmar Moritzer and Bernd Henning</i>	1588
On the efficient simulation of ultrasonic waves on polygonal meshes <i>Jannis Bulling, Hauke Gravenkamp and Carolin Birk</i>	1592
